

Which licence do I need?

Interactive content for K-12

LMS/CMS

Ready-made lessons & custom presentations

MOZAIK

Efficient digital support for students, teachers and parents. Dynamic presentations, amazing interactive tools, 3D scenes, videos, tests, homework assignments and other content for any school subject. In addition, students can solve exercises at home as well and expand their knowledge on their own thanks to the useful content found on mozaWeb. **Review the table on the back and see which licence is right for you.**

User licence

A user licence allows a user to log in on various devices (such as computers, interactive boards, notebooks, tablets or smartphones) using his/her own username and password. The user can use both mozaBook and mozaWeb but can be logged in on only one device at a time. This licence type is recommended when users work on their own computers or want to access the Mozaik platform on multiple devices.

Device-based licence

A device-based licence allows an unlimited number of users to access and use the software on the given device. In this case users do not need to have their own licences. This licence is recommended when several teachers or students use the same device. In this case only the device needs to have a licence regardless of how many teachers or students use it.

Licence overview

	TEACHER / SCHOOL LICENCES		STUDENT LICENCES	
	Mozaik TEACHER	mozaBook CLASSROOM	Mozaik STUDENT	mozaBook SCHOOL-LAB
